## **DETAILED ACTION**

1. The amendment filed October 15, 2003 has been entered.

## Claim Rejections - 35 USC § 112

2. Claims 40-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 40, line 4, the recitation "at least a slice" is vague and indefinite as to what is being set forth, and it seems that "a" should be changed to --one-- or the like; in lines 9-10, the recitation "provided on a side where the thin film semiconductor elements are installed, is open" is vague and indefinite as to what is being set forth, and it is suggested to change it to --provided [on a side where] on the insulating substrate between the slice line and an adjacent one of-- or the like for clarity.

In claim 42, the recitation "correcting the cutting position using the guide line" is vague and indefinite as to what is being set forth, and further is vague and indefinite as to how it relates to the previously recited "detecting" step, and it seems that the recitation should be changed to --[correcting a cutting position] wherein the step of detecting a misalignment of the cutting position is performed by-- or the like.
